

Manufactured in the USA and now available in **South Africa**.

Our new and improved portable oxygen concentrator, the **X-PLO₂R**® from Belluscura, features award-winning technology.

With the Belluscura X-PLO₂R® we Reinvent the way medical oxygen is delivered. Our current treatment focus is on improving the quality of life for millions of people worldwide who suffer from chronic lung diseases, such as the Chronic Obstructive Pulmonary Disease (COPD), respiratory distress caused by COVID-19, and many other respiratory disorders.

SMALL, DISCREET & LIGHTWEIGHT

Our patented portable oxygen concentrator (POC), the X-PLO₂R®, deliver up to 95% pure oxygen to patients 24 hours a day, 7 days a week. The X-PLO₂R® is remarkably lightweight, specifically designed to replace metal oxygen tanks and heavier portable oxygen concentrator devices.

The X-PLO₂R® portable oxygen concentrator has been granted 510(K) clearance from the U.S. Food and Drug Administration (FDA).

LONG-LIFE BATTERY & CONNECTIVITY

The X-PLO₂R® with the Nomad Biometrics™ App is the most advanced portable oxygen concentrator on the market allowing your

patients to get on with life without missing a moment.

The long-life **battery** lasts 4.5 hours powering your oxygen concentrator for all your explorations. While the **Nomad Biometrics™ app** allows you to connect to other devices, including pulse oximeters and fitness wearables.

Not only is this portable oxygen concentrator giving your patients the ability to enjoy life, but it is also affordable.

ADVANCE, AWARD-WINNING TECHNOLOGY

Belluscura has received numerous awards and accolades for its commitment to innovating oxygen therapy, emphasizing the intentionality behind each product to ensure the quality of life for our end users.
